The Conversation Project is dedicated to helping people talk about their wishes for end-of-life care. We developed the **Conversation Starter Kit** to help you talk with your loved ones about your—or their—wishes for end-of-life care. After you have the conversation, you can use this Conversation Starter Kit Summary Sheet to record your wishes, and share them with your doctor or others as you wish. And you can return to it over several conversations.

When should you have the conversation?

Even if you're in good health, it's still important to make sure your loved ones, and your health care team, know your wishes, since anyone's health status can change suddenly. It's particularly important to have the conversation if you or a loved one has a chronic or serious illness. Every conversation will help your loved ones and your care team understand what matters to you.

.....

? **As you think about how you want to live at the end of your life, what's most important to you?**

(For example, being able to recognize my children; being in the hospital with excellent nursing care; being able to say goodbye to the ones I love.)
